## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7, 17 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Dinh (USP 5801987).

Dinh discloses in figure 2 a step-up circuit, and a method thereof, comprising a step-up clock signal generation device (22) that generates a clock signal (CLK) to be used for voltage step-up; at least one step-up stage (in 24) that steps up a power supply voltage based on the clock signal; and a control device (26, 28) that, after starting an operation (start), changes a frequency of the clock signal to be supplied to the step-up stage from a value lower than a normal value to the normal value (figure 6).

### *Allowable Subject Matter*

3. Claims 8-10, 18-20 and 28-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-10, 18-20 and 28-30 would be allowable because the prior art fails to teach or suggest the control device including a combination of elements as claimed.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited as interest because they show some circuits analogous to the claimed invention.
